Grapevine fasteners

Rebstar

Description:

The **Rebstar** - a clip that has been tested a million times, for fastening the **growing shoot** to the stay wire. Rebstar is also particularly suitable for **raspberries**. Thin or thick shoots can easily be enclosed by the two hooks, without excessively squeezing the shoot. A friction skin prevents downwards sliding in steep terrains. Rebstar lasts for years, and just hangs on the wire.

Rebstar for wire \varnothing 2.0 - 3.1 mm

Packaging units:

Rebstar:	Bag of 1000	Item no.: 1000
Rebstar:	Bag of 500	Item no.: 1101
Rebstar:	Bag of 250	Item no.: 1102
Rebstar:	Bag of 50	Item no.: 1103
Rebstar „soft“:	Bag of 1000	Item no.: 1000 B

Rebstar „bio“

Description:

The **Rebstar „bio“** is a clip for fastening the **growing shoot** in **viticulture, or raspberries** to the stay wire. Thin or thick shoots can easily be enclosed by the two hooks, without excessively squeezing the shoot. A friction skin prevents downwards sliding in steep terrains.

The **Rebstar „bio“** is manufactured from renewable raw materials and is **100% biodegradable**.

Packaging units:

Rebstar „bio“:	Bag of 1000	Item no.: 10030
----------------	-------------	-----------------

Streckerclip

Description:

The **Streckerclip** is a cane clip for fastening flat (rods) or bowed canes to the stay wire. A friction skin shapes itself to the wire, which prevents the cane clip from slipping along the wire. The grapevine can then easily be held in the Streckerclip. In order not to need to wind it around the wire, the grapevine is hung in a pair of Streckerclips, which permits a greater separation of grapevine and wire. When pruning, the grapevine is cut close to the Streckerclip, and it falls out by itself.

Streckerclip size 1 for wire \varnothing 1.6 - 3.0 mm

Packaging units:

Streckerclip:	Bag of 1000	Item no.: 1110
Streckerclip:	Bag of 500	Item no.: 1110 B

Streckerclip size 2 for wire \varnothing 3.1 - 4.0 mm

Packaging units:

Streckerclip:	Bag of 1000	Item no.: 1120
Streckerclip:	Bag of 500	Item no.: 1120 B

At bowed canew

At flat rod

Grapevine Clips

Rebstar 1

Description:

The **Rebstar 1** is for fastening the growing shoot to the stay wire. When pruning, the growing shoot is cut above the wire. When training, the clip is opened, the old shoot falls away, after which the new shoot can be clipped into place.

Rebstar 1 for **wire \varnothing 2.0 - 3.1 mm**

Packaging units:

Rebstar 1: Bag of 1000 Item no.: 1001

Rebstar "big"

Description:

The **Rebstar "big"** for fastening the growing shoot to strong, plastic clad, knobby or undulating wires with a diameter of 2.0 - 4.0 mm. Rebstar „big“ can also be used in soft fruit cultivation. It's wide span allows blackberries, blackcurrants, gooseberries or raspberries to be fastened to the stay wire. The support to the stem is flat in form, so that there is no point-support.

Rebstar "big" for wire \varnothing 2.0 - 4.0 mm:

Packaging units:

Rebstar "big": Bag of 1000 Item no.: 1104
 Rebstar "big": Bag of 500 Item no.: 1104 B
 Rebstar "big": Bag of 250 Item no.: 1104 C

Rebfix

Description:

The **Rebfix** is a versatile clip for **wires of 1.2 - 2.5 mm in diameter**. Rebfix is the ideal bending clip for **stainless steel wire systems**. However, it can also be used as a wire spacer (70 mm) for double wires.

Packaging units:

Rebfix: Bag of 1000 Item no.: 1002

Staples

Drahthaken / Drahthaken "S"

Description:

The **Drahthaken** is used for holding double wires together during stitching work. The Drahthaken can be used for all wires - the alternative to iron wire hooks. For a wire separation of 21 mm.

Packaging units:

Drahthaken:	Bag of 1000	Item no.: 1045
Drahthaken "S":	Bag of 1000	Item no.: 1045 B

Drahtduo / Drahtduo "S"

Description:

Drahtduo, Drahtex 0 and Drahtex I are used for holding the double wires together during binding work. Drahtduo and Drahtex hold tightly to the wire, so there is no slippage when on a steep terrains.

Note: Drahtduo, Drahtex 0, Drahtex I and the Drahthaken are also available in an improved **"S" version**. These "S" parts are made of high-quality **UV-resistant material**, and have a light-fast coloration. This extends their life by a factor of two or three.

Drahtduo for stainless steel wire \varnothing 1.2 - 1.6 mm, wire separation 27 mm

Packaging units:

Drahtduo	Bag of 1000	Item no.: 1006
Drahtduo "S"	Bag of 1000	Item no.: 1006 B

Drahtex 0 / Drahtex 0 "S"

Drahtex 0 for wire \varnothing 1.8 - 2.2 mm, wire separation 27 mm

Packaging units:

Drahtex 0	Bag of 1000	Item no.: 1007
Drahtex 0 "S"	Bag of 1000	Item no.: 1007 B

Drahtex I / Drahtex I "S"

Drahtex 1 for wire \varnothing 2.5 - 3.1 mm, wire separation 28 mm

Packaging units:

Drahtex I	Bag of 1000	Item no.: 1008
Drahtex I "S"	Bag of 1000	Item no.: 1008 B

Staples

Drahtex „bio“

Description:

With the **Drahtex „bio“**, double wires can be quickly clipped together during binding work. Due to the two openings in the clamping area, the clip can be used with wire diameters of 1.8 - 2.2 mm and 2.5 - 2.8 mm. **Drahtex „bio“** is made of **100 % biodegradable material** (according to EN 13432).

For wire ø 1,8 - 2,2 mm and ø 2,5 - 2,8 mm

Packaging units::

Drahtex „bio“: Bag of 1000 Item no.: 10070

Drahtex II

Description:

The **Drahtex II** is used for suspending horizontal or hanging canes, or for holding the double wire together.

For wire ø 2.2 - 3.1 mm, wire separation 25 mm

Packaging units:

Drahtex 2: Bag of 1000 Item no.: 1009

Drahtex „big“

Description

Drahtex „big“ is used to hold double wires together during foliage treatment. A wire spacing of 25 mm or 70 mm can be achieved with it. **Drahtex „big“** is made of **100 % biodegradable material** (according to EN 13432).

Drahtex „big“ is suitable for all wires from 1,2 to 3,1 mm.

Packaging units:

Drahtex „big“ : Bag of 500 Item no.: 1090

V-Clip / V-Clip „bio“

Description:

The **V-Clip/ V-Clip „bio“** clips the double wires in viticulture together with a very small spacing (1-3 mm). Includes a practical introduction for fast positioning on the wire. V-Clip made from recycled polypropylene.

The V-Clip „bio“ is 100% biodegradable in accordance with EN Standard 13432.

For wire up to ø 2,8 mm geeignet.

Verpackungseinheiten:

V-Clip:	Bag of 1000	Item no.: 1200
V-Clip:	Box 12500	Item no.: 1200 B
V-Clip „bio“:	Bag of 1000	Item no.: 1201
V-Clip „bio“:	Box 12500	Item no.: 1201 B

Staples

Drahtclip

Description:

Drahtclip is a very stable clip for holding double wires together. The wide wire fixture ensures that the clip holds securely on steep terrains. Drahtclip is made of high-quality **UV-stable material** for a long life. Drahtclip is available in 4 sizes for a wire separation of 25 mm.

Packaging units: Bag of 1000:

Drahtclip 0 (for wire \varnothing 1.6 - 1.8 mm):	Item no.: 1040 A
Drahtclip 1 (for wire \varnothing 2.0 - 2.2 mm):	Item no.: 1040
Drahtclip 2 (for wire \varnothing 2.5 - 2.8 mm):	Item no.: 1040 B
Drahtclip 3 (for wire \varnothing 3.1 - 3.6 mm):	Item no.: 1040 C

Bioclip

Description:

Bioclip is a clip for holding double wires together. Bioclip is made of **100 % biodegradable material** (according to EN 13432). For a wire separation of 21 mm.

Packaging units:

Bioclip:	Bag of 1000	Item no.: 1128
Bioclip:	Bag of 2500	Item no.: 1128 B

Bioclip "strong"

Description:

The **Bioclip "strong"** is a clip for holding double wires together. The Bioclip is made of **100 % biodegradable material** (according to EN 13432).

Packaging units:

Bioclip "strong":	Bag of 1000	Item no.: 1129
Bioclip "strong":	Bag of 2500	Item no.: 1129 B

Raffclip

Description:

The **Raffclip** is a clip for holding double wires together. It is very well suited to vineyards with movable wires. Its red colour makes the clip easy to find, so that it can be collected quickly. The Raffclip can also be used for ice wine covers or bird nets.

Suitable for all wires

Packaging units:

Raffclip:	Bag of 1000	Item no.: 1010
-----------	-------------	----------------

Staples

Minimalclip

Description:

The **Minimalclip** is a very sturdy clip that is used in minimal-prune training. Both wires are secured permanently at a distance of 16 mm to one another.

A great deal of working time can be saved by using the Minimalclip in minimal-prune training.

Suitable for all wires. For a wire separation of 16 mm.

Packaging units:

Minimalclip: Bag of 1000 Item no.: 1208

Multiclip

Description:

The **Multiclip** can be used to attach **shoots** to individual wires or to stronger shoots during foliage treatment in the viticulture. In **garden centres** or **tree nurseries**, young plants can be fastened securely to a stay wire or a plant stake.

For wires up to 3.1 mm. The fixture for the plant has a diameter of 24 mm.

Packaging units:

Multiclip: Bag of 500 Item no.: 1230

Plant stake fasteners

Wellstabfix

Description:

The **Wellstabfix** is used to fasten formed stakes or galvanised structural steel to the stay wire (Ø up to 3.1 mm).

The Wellstabfix is available in 5 different sizes:

Size 5 for formed stake with Ø 5.2 mm:		
Wellstabfix:	Bag of 500	Item no.: 1105
Size 6 for formed stake or galvanised steel with Ø 6 mm:		
Wellstabfix:	Bag of 500	Item no.: 1106
Size 7 for galvanised steel with 7.0 mm:		
Wellstabfix:	Bag of 500	Item no.: 1107
Size 8 for galvanised steel with 8 mm:		
Wellstabfix:	Bag of 500	Item no.: 1108
Size 10 for galvanised steel with 10 mm:		
Wellstabfix:	Bag of 500	Item no.: 1111

Plant stake fasteners

Stabfix

Description:

The **Stabfix** is for fastening bamboo or other plant stems up to approx. 15 mm. Its three-point clamping gives it a secure hold.

Packaging units:

Stabfix: Bag of 1000 Item no.: 1004

Stems on the plant stake

Schnellbinder

Description:

The **Schnellbinder** is a new strap for fastening stems to stakes, that adjusts automatically with the thickness growth.

Once the quick binder Schnellbinder is applied, there is **no need for any further binding work**.

Packaging units:

Schnellbinder length 230 mm Bag of 500 Item no.: 1016

1. Planting year

3.-5. Planting year

5.-7. Planting year

Rebband

Description:

The **Rebband** is used for fastening stems in the cultivation of gardens, fruit and vines. Rebband is 10 mm wide and stretches as the stem grows, but can easily be adjusted by turning the head-piece (fine steps). Rebband saves a great deal of work, when compared with fastenings made from hose or twine. Advantage: Rebband can be repeatedly re-used, ease of handling, lasts for years.

Packaging units:

Rebband is available in the following lengths:

Rebband length 235 mm	Bag of 250	Item no.: 1012
Rebband length 310 mm	Bag of 250	Item no.: 1012 B
Rebband length 360 mm	Bag of 250	Item no.: 1012 C
Rebband length 410 mm	Bag of 250	Item no.: 1012 D

Stems on the plant stake

Kettenband

Description:

This **Kettenband** is a light fastening strap, which can be used in the cultivation of fruit, gardens and vines. It is also particularly suitable for fastening young plants to the plant stake.

Packaging units:

Kettenband length 180mm:	Bag of 500	Item no.: 1023
Kettenband length 180mm:	Bag of 100	Item no.: 1023 B
Kettenband length 330 mm:	Bag of 500	Item no.: 1021
Kettenband length 330 mm:	Bag of 100	Item no.: 1021 B

Rasterband

Description:

Rasterband is used for fastening stems in the cultivation of gardens, fruit and vines. It can be reset quickly in case the pressure is too high. This prevents the stem from growing in.

Packaging units:

Rasterband is available in the following lengths:

Rasterband length 190 mm:	Bag of 500	Item no.: 1014A
Rasterband length 250 mm:	Bag of 250	Item no.: 1014
Rasterband length 310 mm:	Bag of 250	Item no.: 1014 B

Plastoband

Description:

Plastoband is the ideal strap for tying creepers, young trees, vines, shrubs, tomatoes, flowers and berry plants, etc. Plastoband is available in many different lengths and can therefore be used for a very wide range of purposes, e.g. in industry as a bag seal or cable tie.

Packaging units:

Plastoband is available in the following lengths:

Plastoband length 85 mm:	Bag of 1000	Item no.: 1300
Plastoband length 120 mm:	Bag of 1000	Item no.: 1301
Plastoband length 150 mm:	Bag of 1000	Item no.: 1302
Plastoband length 180 mm:	Bag of 1000	Item no.: 1303
Plastoband length 180 mm:	Bag of 1000	Item no.: 1303 rot
Plastoband length 235 mm:	Bag of 1000	Item no.: 1304
Plastoband length 360 mm:	Bag of 1000	Item no.: 1305
Plastoband length 360 mm:	Bag of 1000	Item no.: 1306

Description:

Plastoband "strong" for a strong hold of stems on the planting post.

Packaging units:

The **Plastoband "strong"** is available in the following lengths:

Plastoband "strong" length 360 mm:	Bag of 500	Item no.: 1307
Plastoband "strong" length 430 mm:	Bag of 500	Item no.: 1308

Plastoband „strong“

Drahtrahmen

Drahthalter

Description:

The **Drahthalter** can be fastened to all spruce, acacia, bankirai, concrete or steel posts.

For fastening to a wooden pillar, PH 3.5 x 35 mm "Spax" screws (or equivalent) are used. To fasten the Drahthalter to a concrete or steel post, a wire is passed through the holes on the side.

For wires up to ø 4 mm.

Packaging units:

Drahthalter:	Bag of 500	Item no.: 1011
Accessories:		
PH screws 3.5 x 35 mm:	Bag of 200	Item no.: 1052
	Box of 1000	Item no.: 1052 B

Drahthalter „duo“

Description:

Thanks to the central 3,8 mm fixing hole, the **"duo"** wire holder can be quickly fastened to a wooden post with a screw or a nail.

The holder is fixed to the post by means of the anti-rotation device on the rear and is secured from twisting.

For wires up to ø 3 mm.

Packaging units:

Drahthalter:	Bag of 500	Item no.: 2011
--------------	------------	----------------

Duohalter

Description:

Duohalter is a wire holder for double wires, wire separation 115 mm. It is ideally suitable for wooden posts, but can also be used for concrete and steel posts. The Duohalter can be fastened to the concrete or steel pillar by means of a wire. Screws can be included for attachment to wooden pillars.

Packaging units:

Duohalter:	Bag of 100	Item no.: 1019
Accessories:		
PH screws 3.5 x 35 mm:	Bag of 200	Item no.: 1052
	Bag of 1000	Item no.: 1052 B

Profil Alsace Drahthalter

Description:

This **plastic wire holder** has been developed for the steel pillars made by **Profil Alsace (Dr. Reissacher)**. Plastic wires, or plastic-coated wires, can be fixed to this wire holder.

Available for pillars with R and S hooks.

Packaging units:

For S-hook pillars:	Bag of 500	Item no.: 1119
For R-hook pillars:	Bag of 500	Item no.: 1119 A

Montageschlüssel für Drahthalter: 1-off Item no.: 1119 B

Drahtrahmen

Drahtschoner

Description:

Thanks to its four versions, the new **REMA Drahtschoner** can be used as a wire protection on a great many common steel posts. The Drahtschoner is locked in position by the locking pin on the rear side. This is attached at various heights, allowing the right Drahtschoner to be found for every post. Thanks to the opening at the top end, the Drahtschoner can also be used with long hooks.

Packaging units:

For Dr. Reisacher, R-hooks:
Version 0: Bag of 500 Item no.: 1220

For Hadley, Oslavan, Voest/Leova:
Version 1: Bag of 500 Item no.: 1221

For Dr. Reisacher, S-Haken, Linus Vinus L & XL, Hepa, Rupp, Artos:
Version 2: Bag of 500 Item no.: 1222

For Fabijan Weiss Vogau F60:
Version 3: Bag of 500 Item no.: 1223

Heftfix

Description:

The **Heftfix** is a holder for moveable double-wires. Heftfix is folded out after the training, so that a separation of 300/400 mm is achieved. When the Heftfix unfolds, the wires also move downwards towards the growth. (150/200 mm). Hence, the young shoots can grow through the double wires and are **protected against breaking in stormy weather** conditions.

The Heftfix is folded together when the shoots are long enough, and the wires are suspended in the wire holder.

Packaging units:

Length 300 mm: Bag of 100 Item no.: 1017
Length 400 mm: Bag of 100 Item no.: 1017 B

Accessories for wooden pillar:

PH-screws 3.5 x 35 mm: Bag of 200 Item no.: 1052
PH-screws 3.5 x 35 mm: Box of 1000 Item no.: 1052 B

Adapter

Description:

The **Adapter**, the **Heftfix** or the **Ausleger** can be attached to any steel or concrete pillar. The Heftfix is screwed to the adaptor (Spax PH 3.5 x 25 mm), then fastened in the wire holder of the steel pillar with a wire. When working with the Heftfix 400 mm, the wire fits in the wire holder of the steel pillar when folding the Heftfix together.

Packaging units:

Adapter: Bag of 100 Item no.: 1060
PH-screws 3.5 x 25 mm: Bag of 200 Item no.: 1061

Drahtrahmen

Ausleger

Description:

The **Ausleger** is used to let the young shoots grow in themselves. After the training, the Ausleger is placed horizontal, and the wires hung outside in the fixture.

The young shoots can now grow in. Once the shoots are long enough, the wires are hung in the fixtures on the post, and the extension piece is placed vertically, so that it is not in the way during foliage treatment.

The Ausleger is available in the following lengths:

Packaging units:

Ausleger 160 mm long:	Bag of 100	Item no.:1218
Ausleger 310 mm long:	Bag of 100	Item no.:1018
Ausleger 360 mm long:	Bag of 100	Item no.:1018 B
Ausleger 410 mm long:	Bag of 100	Item no.:1018 C
Ausleger 460 mm long:	Bag of 100	Item no.:1018 D

Accessories for wooden pillar:

PH screws 3.5 x 35 mm:	Bag of 200	Item no.: 1052
PH screws 3.5 x 35 mm:	Box of 1000	Item no.: 1052 B

Drahtöse

Description:

The **Drahtöse** is a wire holder for concrete pillars or other pillars unsuitable for nails or screws (steel pipe, angular steel). The Drahtöse wire eye is fixed to the pillar with a wire, and the wire is then pulled through the eye. The Drahtöse wire eye is manufactured from high-quality material stable when exposed to UV light, which means that it will last for years. The Drahtöse is for wires up to \varnothing 5 mm.

Packaging units:

Drahtöse:	Bag of 500	Item no.: 1011 B
-----------	------------	------------------

Pfahlschutzkappen

Description:

The **Pfahlschutzkappe** protects the end of the pillar from weathering. The pillar caps are available in the following diameters:

Pfahlschutzkappe \varnothing 100 mm for pillars up to 80 mm diameter:	Bag of 100	Item no.: 1085
Pfahlschutzkappe \varnothing 120 mm for pillars up to 100 mm diameter:	Bag of 50	Item no.: 1086

Nails (galvanized) for fastening the post cap to the wooden post can also be supplied.

Nails 3.1 x 6.5 mm:	Bag of 100	Item no.: 1051
---------------------	------------	----------------

Drahtrahmen

Pfahlstütze (12 cm wide and 34 cm long)

Description:

The **REMA Pfahlstütze** is used for straightening your vineyard posts in a **rain-sodden, loose, or sandy ground**.

Usage:

1. Align the post in a straight position
2. Put the Pfahlstütze on the opposite side from where the wind is blowing next to the post and into the ground.
3. The Pfahlstütze is easily driven into the ground using a squared timber (ca. 8 x 4 x 30 cm) and a heavy hammer.
4. We recommend compressing the ground behind the Pfahlstütze with the squared timber and hammer.

Packaging units:

Pfahlstütze:	Pack of 20	Item no.: 3001
	Box of 140	

Irrigation

Schlauchclip

Description:

The **Schlauchclip** is used for fastening irrigation hoses to stay wire (up to a diameter of 3.1 mm). Due to the rib, the water running along the hose drips off at the hose clip.

Packaging units:

Schlauchclip 16 mm (for ø 16-17 mm hoses):	Bag of 1000	Item no.: 1025
Schlauchclip 20 mm (for ø 20 mm hoses):	Bag of 1000	Item no.: 1025 B

Schlauchhalter

Description:

The **Schlauchhalter** for attaching drip hoses to stay wires up to 4 mm. (Holder spacing 50 - 60 cm). Due to the rib, the water running along the hose drips off at the hose holder. This holder makes fast assembly possible.

Packaging units:

Hose holder 16 mm:	Bag of 500	Item no.: 1070
Hose holder 20 mm:	Bag of 500	Item no.: 1071
Hose holder 25 mm:	Bag of 250	Item no.: 1072
Hose holder 32 mm:	Bag of 250	Item no.: 1073

Irrigation

Doppelschlauchhalter 250 mm or 325 mm long

Description:

The double hose holder **Doppelschlauchhalter** can be used to hold two hoses to the left and right of the plants (blueberries, currants, cherry, peach, apricot), with a hose distance of 235 mm or 300 mm. This ensures even watering of the plants. The double hose holder **Doppelschlauchhalter** can also be used for underfloor lawn irrigation. For hoses with 16 or 20 mm diameter.

The double hose holder **Doppelschlauchhalter 250 mm** is available in the following sizes:

Packaging units:

Doppelschlauchhalter ø 16 mm:	Bag of 250	Item no.: 1036
Doppelschlauchhalter ø 20 mm:	Bag of 250	Item no.: 1036 B

The double hose holder **Doppelschlauchhalter 325 mm** is available in the following sizes:

Packaging units:

Doppelschlauchhalter ø 16 mm:	Bag of 250	Item no.: 2036
Doppelschlauchhalter ø 20 mm:	Bag of 250	Item no.: 2036 A

The hoses then are covered with bark mulch so that they do not interfere with mulching.

Schlauchabstandhalter

Description:

A drip hose can be hung 10 cm from the wire (wire ø up to 4 mm) with the hose spacer, in order to keep the wire free for training. We recommend that you additionally fasten the drip hose at each pillar with a Rebband 310 mm (item no. 1012 B).

Schlauchabstandhalter:

This hose spacer (Schlauchabstandhalter) with the old shape offers a good hold, even with thin-walled hoses.

Packaging units:

Schlauchabstandhalter ø 16 mm:	Bag of 500	Item no.: 1028
Schlauchabstandhalter ø 20 mm:	Bag of 500	Item no.: 1028 B

Schlauchabstandhalter "NEW":

Thanks to the new receptacle the hose can be pushed quickly into the holder.

We recommend that you additionally fasten the drip hose at each pillar with a Rebband 310 mm (item no. 1012 B).

Packaging units:

Schlauchabstandhalter new ø 16 mm:	Bag of 500	Item no.: 1034
Schlauchabstandhalter new ø 20 mm:	Bag of 500	Item no.: 1034 B

Schlauchabstandhalter 250 mm lang

A drip hose can be hung 25 cm from the wire (wire ø up to 4 mm) with the hose spacer Schlauchabstandhalter, in order to keep the wire free for training. We recommend that you additionally fasten the drip hose at each pillar with a Rebband 310 mm (item no. 1012 B).

Packaging units:

Schlauchabstandhalter für Ø 16 mm:	Bag of 250	Item no.: 1035
Schlauchabstandhalter für Ø 20 mm:	Bag of 250	Item no.: 1035 A
Schlauchabstandhalter für Ø 25 mm:	Bag of 250	Item no.: 1035 B

Irrigation

Erdspieß

Description:

The irrigation hose (ø up to 25 mm) can be securely attached to the ground for ground irrigation using the **ground stake Erdspieß**. The ground stake Erdspieß is available in two lengths: 145 mm and 250 mm. **The 250 mm ground stake Erdspieß** holds irrigation hoses securely even in loose, deep soils. The **ground stake Erdspieß** is easy to drive into the soil with a rubber hammer

Packaging units:

Erdspieß 145 mm:	Bag of 100	Item no.: 1029
Erdspieß 250 mm:	Bag of 100	Item no.: 2029

Bird protection

Netzclip

Description:

The **Netzclip** is used for fastening bird nets and holding them together.

Packaging units:

Netzclip:	Bag of 1000	Item no.: 1026
-----------	-------------	----------------

Netzhalter

Description:

With the **Netzhalter** the lateral cover nets can be quickly fastened to the wire. It is possible to hook in the nets from both sides using the two hooks on the Netzhalter.

Packaging units:

Netzhalter:	Bag of 500	Item no.: 1039
-------------	------------	----------------

Netzaufhänger

Description:

With the **REMA Netzaufhänger** nets are securely attached to the ridge wire in combination with the **REMA Kettenband 330 mm / 570 mm**. The chain tape is held securely in place by barbs. The tape is hooked in on the opening side. When pressure is applied from below, the chain tape springs out of the holder and the net is free again.

Packaging units:

Netzaufhänger:	Bag of 100	Item no.: 1037
Netzaufhänger:	Bag of 500	Item no.: 1037 B

Bird protection

Netzhaken

Description:

Using the **net hook Netzhaken**, it is possible to fasten all types of protective net quickly to the wire. The hook is very sturdy and provides a secure hold even during stormy weather. The material has **very high UV stability** and can thus be used for several years without problems.

Packaging units:

Netzhaken: Bag of 1000 Item no.: 1027

Netznadel

Description:

Nets are placed on the sides to protect the grapes from birds and wasps (white wine production). These nets can be fixed rapidly and simply with the **Netznadel**. The securing lug at the head is also hung on the net, to avoid that the Netznadel, can slip off itself in case of wind.

Packaging units:

Netznadel: Bag of 500 Item no.: 1024

Netzverbinder

Description:

Nets can be connected or gathered together quickly with the **Netzverbinder**. The Netzverbinder can be attached and removed quickly. This saves time when attaching the lateral cover nets.

Packaging units:

Netzverbinder: Bag of 500 Item no.: 1038

Marking

Selektierband

Description:

The **Selektierband** is used to mark stems in plant breeding and is available in the following colours:

Packaging units:

Selection strap, red:	Bag of 1000	Item no.: 1013 R
Selection strap, yellow:	Bag of 1000	Item no.: 1013 G
Selection strap, orange:	Bag of 1000	Item no.: 1013 O
Selection strap, white:	Bag of 1000	Item no.: 1013 W

Berry Cultivation

Rebstar (Himbeerklammer)

Description:

The **Rebstar** is a clip that has been tested a million times, for fastening raspberries to the stay wire. Thin or thick shoots can easily be enclosed by the two hooks, without excessively squeezing the shoot. The support to the stem is flat in form, so that there are no imprints.

Packaging units:

Rebstar:	Bag of 1000	Item no.: 1000
Rebstar:	Bag of 500	Item no.: 1101
Rebstar:	Bag of 250	Item no.: 1102
Rebstar:	Bag of 50	Item no.: 1103
Rebstar „soft“:	Bag of 1000	Item no.: 1000 B

Rebstar „bio“ (Himbeerklammer)

Description:

The **Rebstar „bio“** is a clip for fastening the **growing shoot** in **viticul-ture, or raspberries** to the stay wire. Thin or thick shoots can easily be enclosed by the two hooks, without excessively squeezing the shoot. A friction skin prevents downwards sliding in steep terrains. The **Rebstar „bio“** is manufactured from renewable raw materials and is **100% biodegradable**.

Packaging units:

Rebstar „bio“:	Bag of 1000	Item no.: 10030
----------------	-------------	-----------------

Rebstar „big“ (Himbeerklammer groß)

Description:

Blackberries, blackcurrants, gooseberries or raspberries can be fastened to the stay wire using the **Rebstar „big“**. Bruises on the plant are avoided due to the large width and flat shape of the surface to the shoot.

Packaging units:

Rebstar „big“:	Bag of 1000	Item no.: 1104
Rebstar „big“:	Bag of 500	Item no.: 1104 B
Rebstar „big“:	Bag of 250	Item no.: 1104 C

Gitterspannband mit Rebstar

Description:

The **Gitterspannband** is used for the gentle fastening of all berry plants. Shoots can be fastened very gently in conjunction with the Rebstar raspberry clip. Rubbing spots on the plant are prevented by the wide surface on the trellis strap retainer.

Packaging units:

Gitterspannband 45 mm wide	1 roll 50 m long	Item no.: 1075
----------------------------	------------------	----------------

Berry Cultivation

Allzweckklammer

Description:

The **Allzweckklammer** can be used in the viticulture, fruit culture and horticulture for fastening young plants to the stay wire.

Packaging units:

Allzweckklammer 110 mm:	Bag of 1000	Item no.: 1091
Allzweckklammer 110 mm:	Box 10000	Item no.: 1091 D
Allzweckklammer 70 mm:	Bag of 1000	Item no.: 1092
Allzweckklammer 70 mm:	Box 10000	Item no.: 1092 C

Stammhalter „soft“

Description:

Sensitive shoots are attached to the wire with the **Stammhalter "soft"**. This soft clip can be pressed onto the wire by hand without the use of tools. This enables all kinds of plants to be quickly equipped with a clip. The **Stammhalter "soft"** is available in the following sizes and lengths:

Length 100 mm:

Packaging units Stammhalter "soft":

Size 2 for wire Ø 2.0 - 2.2 mm	Bag of 500	Item no.: 2122
Size 3 for wire Ø 2.5 - 2.8 mm	Bag of 500	Item no.: 2123

Length 125 mm:

Packaging units Stammhalter "soft":

Size 2 for wire Ø 2.0 - 2.2 mm	Bag of 500	Item no.: 2132
Size 3 for wire Ø 2.5 - 2.8 mm	Bag of 500	Item no.: 2133
Size 4 for wire Ø 3.0 - 3.6 mm	Bag of 500	Item no.: 2134

Length 175 mm:

Packaging units Stammhalter "soft":

Size 2 for wire Ø 2.0 - 2.2 mm	Bag of 500	Item no.: 2142
Size 3 for wire Ø 2.5 - 2.8 mm	Bag of 500	Item no.: 2143
Size 4 for wire Ø 3.0 - 3.6 mm	Bag of 500	Item no.: 2144

Stems on the pillar

Kettenband 570 mm

Description:

The **Kettenband 570 mm** is a long-lasting strap for fastening trees. Its length allows an 8-fold loop to be made if necessary. First fasten the Kettenband to the pillar, so that it lies loosely in place and then fasten the tree. As the tree grows, the Kettenband can easily be adjusted. If the Kettenband is cut down the middle, two straps are obtained, which are adequate for fixing saplings to thin pillars (bamboo, bankirai, acacia).

Packaging units:

Length 570 mm: Bag of 100 Item no.: 1020

Kettenband 330 mm

Description:

The **Kettenband 330 mm** chain strap is a light strap for fastening fruit trees or grape vines to thin posts.

Packaging units Kettenband 330 mm:

Length 330 mm: Bag of 500 Item no.: 1021
 Length 330 mm: Bag of 100 Item no.: 1021 B

Kettenband 330 mm "extra strong"

Description:

The **Kettenband 330 mm "extra strong"** is a strong mounting strap to fasten trees to a thin pillar.

Packaging units Kettenband 330 mm "extra strong":

Length 330 mm: Bag of 250 Item no.: 1022

Stammband 420 mm

Description:

The **Stammband 420 mm** is a wide, long-lasting strap for fastening stems in fruit growing and viticulture. Its smooth surface makes it very gentle to stems.

Hail protection nets can also be fastened over the winter to the upper rope using the Stammband.

Packaging units:

Stammband 420 mm Bag of 100 Item no.: 1015

Stems on the stay wire

Stammhalter

Description:

The **Stammhalter** is used for fastening plants or stems to stay wire. This economical fixing method is used in the cultivation of berries and fruit. The length of the Stammhalter is selected such that the stem has lots of room in which to grow over several years without in-growing. It is advisable to use a longer stem holder on the lower wire, since the stem grows fastest here. The stem holder is pressed tightly to the wire by the fixture, preventing the tree from slipping down.

Available in the following versions and packaging units:

Length 100 mm for stem diameters up to 30 mm:

Size 1 for wire Ø 1.4 - 1.8 mm	Bag of 500	Item no.: 1121
Size 2 for wire Ø 2.0 - 2.2 mm	Bag of 500	Item no.: 1122
Size 3 for wire Ø 2.5 - 2.8 mm	Bag of 500	Item no.: 1123
Size 4 for wire Ø 3.0 - 3.6 mm	Bag of 500	Item no.: 1124
Size 5 for wire Ø 3.7 - 4.2 mm	Bag of 500	Item no.: 1125

Length 125 mm for stem diameters up to 40 mm:

Size 1 for wire Ø 1.4 - 1.8 mm	Bag of 500	Item no.: 1131
Size 2 for wire Ø 2.0 - 2.2 mm	Bag of 500	Item no.: 1132
Size 3 for wire Ø 2.5 - 2.8 mm	Bag of 500	Item no.: 1133
Size 4 for wire Ø 3.0 - 3.6 mm	Bag of 500	Item no.: 1134
Size 5 for wire Ø 3.7 - 4.2 mm	Bag of 500	Item no.: 1135

Length 175 mm for stem diameters up to 60 mm:

Size 2 for wire Ø 2.0 - 2.2 mm	Bag of 500	Item no.: 1142
Size 3 for wire Ø 2.5 - 2.8 mm	Bag of 500	Item no.: 1143
Size 4 for wire Ø 3.0 - 3.6 mm	Bag of 500	Item no.: 1144
Size 5 for wire Ø 3.7 - 4.2 mm	Bag of 500	Item no.: 1145

Length 210 mm for stem diameters up to 70 mm:

Size 2 for wire Ø 2.0 - 2.2 mm	Bag of 500	Item no.: 1152
Size 3 for wire Ø 2.5 - 2.8 mm	Bag of 500	Item no.: 1153
Size 4 for wire Ø 3.0 - 3.6 mm	Bag of 500	Item no.: 1154
Size 5 for wire Ø 3.7 - 4.2 mm	Bag of 500	Item no.: 1155

Length 310 mm for stem diameters up to 110 mm:

Size 3 for wire Ø 2.5 - 2.8 mm	Bag of 500	Item no.: 1163
Size 4 for wire Ø 3.0 - 3.6 mm	Bag of 500	Item no.: 1164

Easy attachment thanks to our Stammhalterzange p. 23.

Doppelstammhalter

Description:

The **Doppelstammhalter** enables the fastening of young plants at the first fixture. When the stem continues to grow the Doppelstammhalter can be widened by the second fixture.

Packaging units:

Doppelstammhalter length 125-175 mm:

Size 2 for ø 2.0 - 2.2 mm:	Bag of 500	Item no.: 1172
Size 3 for ø 2.5 - 2.8 mm:	Bag of 500	Item no.: 1173
Size 4 for ø 3.0 - 3.6 mm:	Bag of 500	Item no.: 1174

Doppelstammhalter length 160-210 mm:

Size 3 for ø 2.5 - 2.8 mm:	Bag of 500	Item no.: 1183
----------------------------	------------	----------------

Stems on the stay wire

Stammhalterzange „Duo“

Description:

Stem holders and double stem holders can be attached to the wire and removed again with ease using the special **Stammhalterzange "Duo"**.

Packaging units:

Stammhalterzange „Duo“: 1-off Item no.: 1080 C

Feststeller „mini“ + Stammband 420 mm

Description:

With this fastening system, fruit trees can be attached securely and gently to the top wire in wire systems.

Packaging units Feststeller "mini" + Stammband 420 mm:

Bag of 100 Item no.: 1096

Feststeller „mini“

Description:

Packaging units:

Bag of 100 Item no.: 1097

Branch Clips

Faster, larger fruit yields by laying all first-year shoots horizontal. These first-year shoots are best laid horizontal with REMA Astfix II or Astfix III branch clips in July-August, when they are fully grown, but have nevertheless not yet hardened. The change in position makes the shoots constantly ready to bear fruit. The horizontal position is reached after about 8 weeks, and the branch clip can be removed. Astfix saves a great deal of work in comparison with binding or weighting. The branch does not spring back. Astfix lasts for years.

Astfix 1

Description:

The **Astfix 1** is for bending down young shoots on fruit trees. Astfix 1 is most suited for bending down a branch with an upward curve. By turning Astfix 1, a light or a strong bending of the branch is achieved.

Packaging units:

Bag of 500	Item no.: 1030
Bag of 100	Item no.: 1030 B

Astfix 2, Astfix 2 „big“ and Astfix 3

Description:

The **Astfix 2** is an extremely strong clip, with which young shoots or first-year branches can be precisely held away from the trunk. They are applied over or under the branch, depending on stem strength.

The **Astfix 2 „big“** is a big branch clip which is used for forming young branches with a stem diameter up to approx. 35 mm.

Astfix 2:

Astfix 2 „big“:

Astfix 3:

Packaging units:

Astfix 2:	Bag of 500	Item no.: 1031
Astfix 2:	Bag of 100	Item no.: 1031 B
Astfix 2 „big“:	Box of 50	Item no.: 2031
Astfix 2 „big“:	Bag of 100	Item no.: 2031 B
Astfix 2 „big“:	Bag of 250	Item no.: 2031 C
Astfix 3:	Bag of 250	Item no.: 1032
Astfix 3:	Bag of 100	Item no.: 1032 B
Astfix 3 „big“:	Bag of 100	Item no.: 2032 B
Astfix 3 „big“:	Bag of 250	Item no.: 2032 C

If several branches leave the trunk at the same height, one of them can be bent with **Astfix 2** while the other is guided away with **Astfix 3**, since it has a arm with a lifted section by approx. another 20 mm.

Branch Clips

Astfixsortiment 25

Content:

Astfix 1	3 items
Astfix 2	15 items
Astfix 2 „big“	2 items
Astfix 3	4 items
Astfix 3 „big“	1 items

Packaging units:

Astfixsortiment 25: Bag of 25 items Item no.: 1033

Astfixsortiment 150

Content:

Astfix 1	10 items
Astfix 2	100 items
Astfix 2 „big“	10 items
Astfix 3	25 items

Tomatoes

Tomatenhaken

Description:

The **Tomatenhaken** is delivered incl. 12 m of organic tomato cord and is suitable for the following crops:

- Tomato cultures
- Sweet pepper cultures
- Cucumber cultures

Packaging units:

Tomatenhaken:	Box of 125	Item no.: 1354
Tomatenhaken:	1-off	Item no.: 1355

Bio Tomatenclip

Description:

The **Bio Tomatenclip** is a 100 % biodegradable clip with rounded edges to avoid injuring the plant.

Suitable for:

- Tomato cultures
- Sweet pepper cultures
- Cucumber cultures

Packaging units:

Bio Tomatenclip:	Bag of 1000	Item no.: 1350
------------------	-------------	----------------

Bio Tomaten/Paprikaschnur

Description:

The **Bio Tomaten- / Paprikaschnur** is 100 % biodegradable. The cord has a diameter of 1.6 mm and can accept loads up to 400 N. There are about 3550 meters on a 5 kg roll.

Packaging units:

Bio Tomaten- / Paprikaschnur:	1 roll	Item no.: 1353
-------------------------------	--------	----------------

Folientunnel

Gewebeanker/Erdnagel 205 mm long

Description:

The **fabric anchor/Gewebeanker** is used to fasten fabric tarpaulins to the ground. It is manufactured from **UV-resistant** material and is very stable and durable. The **fabric anchor/Gewebeanker** is easy to tap in with a rubber hammer.

Packaging units:

Gewebeanker:	Bag of 100	Item no.: 3020
Gewebeanker:	Bag of 250	Item no.: 3020 B
Gewebeanker:	Box 3x 250	

Garden

Pflanzenclip

Description:

The **Pflanzenclip** is used for attaching flowers and plants with thin stems to the plant support.

Packaging units:

Pflanzenclip ø 13 mm:	Bag of 1000	Item no.: 1094 D
Pflanzenclip ø 16 mm:	Bag of 1000	Item no.: 1094 C
Pflanzenclip ø 20 mm:	Bag of 1000	Item no.: 1094 B
Pflanzenclip ø 25 mm:	Bag of 1000	Item no.: 1094

Ringklammer

Description:

The universal **Ringklammer** can be used for fastening young plants and pot plants to the stake.

Packaging units:

Ringklammer ø 32 mm:	Bag of 1000	Item no.: 1093
Ringklammer ø 44 mm:	Bag of 500	Item no.: 1093 B

Avenue trees

Baumband

Description:

The **Baumband** tree strap is used to fix trees in streets and avenues. Its strong construction allows trees of all types and sizes to be fastened quickly. The tree strap is made of environmentally-friendly polyethylene and is UV-stabilised to ensure a long life.

Note:

Each tree strap has to be fixed to the pillar with a nail or a wire loop.

A high cost saving is achieved, since the tree strap can be reused. The tree strap is thus also very well suited for towns and municipalities.

Packaging units:

Baumband length 630 mm:	Bag of 50	Item no.: 1910
Baumband length 810 mm:	Bag of 50	Item no.: 1920
Connecting part extra:	Bag of 50	Item no.: 1930

Feststeller + Kettenband 330 mm extra strong

Description:

Fastener for fastening large trees or container plants to the stay wire.

Application:

The Feststeller fastener is pushed onto the wire with the recess on the threaded part, then clamped tightly onto the wire with the hexagonal nut (use the open-ended spanner included in the bag). The tree can now be fastened with the Kettenband through the opening on the Feststeller.

Note: Wrap with fleece or cloth in the area of the Feststeller to provide sensitive stems with additional protection against damage.

Packaging units:

Feststeller + Kettenband 330 mm "extra strong":	Bag of 100	Item no.: 1096
Feststeller without Kettenband:	Bag of 100	Item no.: 1095
